

Summit Partners Invests in ApoCell

September 30, 2009

HOUSTON, TX and BOSTON, MA — ApoCell, Inc., a specialized molecular diagnostics laboratory that analyzes the effectiveness of new compounds for the world's leading pharmaceutical and biotechnology companies, announced today that it has received an investment from growth equity investor Summit Partners. The investment will be used to fund ApoCell's organic growth initiatives and continued development of the company's state-of-the-art technology platforms.

"The decision to raise outside capital was an important and strategic move for ApoCell, and we believe Summit will assist us in achieving even greater results," said Dr. Darren Davis, ApoCell's CEO. "With Summit's strategic guidance and global network of contacts, we are now uniquely positioned to rapidly expand ApoCell's offering and provide even more valuable service to our customers."

ApoCell was founded in 2004 by Dr. Davis to commercialize biomarker technologies, some of which were developed at The University of Texas M.D. Anderson Cancer Center. ApoCell spun out as a stand-alone company in 2005 and has experienced rapid growth since inception. The company leverages expertise in the areas of oncology, molecular diagnostics, biomarkers and drug development to isolate and analyze rare cells, along with measuring the level of expression of biomarkers in blood and tissue specimens from clinical trial subjects with various types of diseases (e.g., cancer and diabetes). ApoCell can support the analysis and specimen logistics for many types of projects from preclinical to Phase III trials world-wide.

"At Summit, we've been investing in life sciences and laboratory companies for nearly twenty years. Today we see a large-scale, pressing demand for personalized therapies—particularly in oncology—and ApoCell is ideally positioned to become a market leader," said Tom Jennings, Managing Director with Summit Partners who will join the ApoCell Board of Directors. "ApoCell has a great track record, an exceptional management team and an impressive customer base. We look forward to working with this terrific organization to achieve even greater success."

About ApoCell

Based in Houston, Texas, ApoCell (www.apocell.com) was founded in 2004 and leverages expertise in the areas of oncology, diabetes, molecular diagnostics and drug development to measure biomarker signatures in clinical trial subjects. The company's proprietary methods provide early proof of mechanism of action and monitor the effectiveness of various types of drugs by measuring biomarker expression patterns in biopsies, blood and rare cell types.

About Summit Partners

Summit Partners (www.summitpartners.com) is a growth equity investor that provides private equity and venture capital to rapidly growing companies.
